

## **PARDUBICE**

Pardubice, with nearly 100,000 inhabitants, is one of the ten largest cities in the Czech Republic, 100 km east of the capital Prague. The city, first mentioned in 1295, went through a rich and exciting history which has left many traces on it. The Old Town and the Castle, built in a unique blend of Late Gothic and Early Renaissance styles by the Pernstejn Family in the 16th century, are surrounded by green parks and blue rivers. The Perstejn Palace, the church of St. Bartolomew and the 60 m high Green Tower in the town centre as well as the baroque Old Town square, the historical town hall and other picturesque sights in Pardubice are popular with tourists.

## **PARDUBICE INDUSTRY**

The city is famous for its traditional products as gingerbread and beer but nowadays it is well known particularly for its chemical products, electronics and machine-tool production. Electronics has been developing in Pardubice since 1919 when the Telegrafia company, producer of telephone exchanges, sets and radio receivers was founded here. Presently a broad range of electronic products as communication systems, radar and microwave devices are both designed and manufactured in local companies.

## **UNIVERSITY OF PARDUBICE**

The beginning of the University of Pardubice is connected with the year 1950 when the Institute of Chemical Technology was established to meet the needs of the East-Bohemian region which had a highly developed chemical industry. The University of Pardubice today offers modern study programmes at its four faculties (Jan Perner Faculty of Transport, Faculty of Chemical Technology, Faculty of Economics and Administration, Faculty of Humanities) and two institutes.
